

Load Testing with JMeter (Online)

Application URL:

<http://103.94.135.204:8080/m1> (group no. mod 3 = 0)

<http://103.94.135.204:8080/m2> (group no. mod 3 = 1)

<http://103.94.135.204:8080/m3> (group no. mod 3 = 2)

Number of Threads:

40

Ramp-up Period:

8 seconds

Data File:

Create a data file with 40 random e-passport numbers and names. Try your best to ensure your data doesn't conflict with other groups.

Output:

Summary Report showing the overall status of 40 threads

Submission:

1. JMeter script (.jmx)
2. Screenshot of the summary report
