

Load Testing with JMeter (Online)

Application URL:

<http://103.94.135.204:8080/mod0> (group no. mod 3 = 0)

<http://103.94.135.204:8080/mod1> (group no. mod 3 = 1)

<http://103.94.135.204:8080/mod2> (group no. mod 3 = 2)

Number of Threads:

50

Ramp-up Period:

10 seconds

Data File:

Create a data file with random 50 e-passport numbers and names. Try your best to ensure your data doesn't conflict with other groups.

Restriction:

You aren't allowed to use the variables of the data file more than once in your script. Please save your script (.jmx file) before starting the load test.

Output:

Summary Report showing the overall status of 50 threads
